THE SHEOGA VALUE

Quality Costs Less

Using beautiful Appalachian hardwood locally harvested from Northeast Ohio and Western Pennsylvania, Sheoga's unique formula of components includes premium, furniture-grade lumber in the mix of raw materials to manufacture our precisely milled hardwood flooring.

Using Sheoga Hardwood Flooring saves you time and money

- Precision slow-milling and straighter boards allow for quicker installation
- Less over-wood saves time & money on job site floor sanding/preparation
- Premium lumber used for less material waste
- Longer Length Average – aesthetically pleasing
- Prefinished floors finished with durable UV-Cured Ceramic Polyurethane
- Made in America from sustainable sources
- Quality hardwood flooring for a healthy home
- Side & End Matched (Tongue & Grooved on all four sides)

QUALITY, BEAUTY, PRECISION

Established in 1982, Sheoga Hardwood Flooring has over 40 years of experience crafting premium hardwood flooring. Nestled in the rolling hills of Geauga County, Ohio, within a vibrant Amish community, our skilled local craftsmen create the finest quality 3/4" solid and engineered flooring—unfinished, prefinished, smooth, or textured. Known for exceptional American-made hardwood flooring, Sheoga is trusted by professionals for unmatched quality and value at an affordable price.

THE PRECISE PROCESS PROPER CARE FROM START TO FINISH

Sheoga is dedicated to crafting the highest quality 3/4" hardwood flooring, backed by skilled craftsmanship, precise milling, and exceptional service.

All Sheoga Hardwood Flooring is 3/4" thick. Available widths include 2 1/4", 3 1/4", 4 1/4", 5 1/4", 6 1/4", 7 1/4", 8 1/4", 9 1/4" and 11 1/4" depending on species/grading. Custom widths are available.

- **RECEIVING**

Shipments of green, fresh-cut hardwood lumber arrive daily. Then the precise process begins, transforming that lumber into a premium Sheoga brand floor.

- **GRADING**

Every board is individually measured and graded for quality assurance.

- **KILN DRYING**

After naturally air-drying, lumber is kiln-dried to 6-8% moisture content, equalized and conditioned for interior use.

- **ROUGH MILL**

Once lumber is properly dried, we sort for grade, width, and any defects. Then we separate blanks for Clear or Character grade flooring.

- **LARGE BLANK INVENTORY**

Flooring blanks are stored in a climate-controlled environment.

- **SIDE MATCHING**

Our hand-fed tongue & groove milling process ensures a precise fit for ease of installation, sand and finish.

- **END-MATCHING**

Ends are cut square, then tongue & grooved for a perfect end joint.

- **QUALITY CONTROL**

Continuous checkpoints throughout every process ensures proper grading, milling, and precision fit on the job site.

- **DETAILED TEXTURING**

Various texture choices are available to add that perfect finishing touch to your decor.

- **PACKAGING**

After final inspection, flooring is bundled; then stacked in units, covered, securely banded and ready to ship to our global market places.

UNFINISHED FLOORING

Find The Perfect Species, Finish How You Like

The various species of unfinished 3/4" solid or engineered flooring available from Sheoga Hardwood Flooring come in two different grades. Clear grade, which is free of knots/defects and Character grade that features tight, fillable knots and mineral streaks which add charm and offer a less formal appearance.

BEECH

Closed, straight grain with uniform texture. Heartwood is mostly reddish brown and sapwood is generally pale white.

CHERRY

A traditional and elegant hardwood flooring option. Cherry heartwood is light to dark reddish brown.

*also available in no sap

HICKORY

Closed grain with moderate definition. Heartwood is tan to reddish and sapwood is white to cream with fine brown lines.

MAPLE

Closed grain with uniform texture. Heartwood is creamy white to light reddish brown. Sapwood is pale to creamy white.

RED OAK

Beautiful reddish-brown wood with wider grain patterns. Heartwood and sapwood are similar, with sapwood lighter in color.

WALNUT

Heartwood ranges from deep, rich dark brown to purplish black. Sheoga Brand Walnut is not steamed leaving sapwood nearly white to tan. *also available in no sap

WHITE OAK

Heartwood is light brown and sapwood is cream to white. Some boards may have a pinkish tint or slight grayish cast.

WHITE OAK LIVE SAWN

Live sawn boards (sometimes referred to as European or French cut) give hardwood floors a unique appearance.

WHITE OAK QUARTERED/RIFT

Special white oak cuts with quarter sawn having a flaky, "tiger ray" appearance and rift cut having a tighter, straight grain look.

White Oak Character
Prefinished Natural

ENGINEERED FLOORING

Wear layer same as our Solid Flooring

Sheega's engineered flooring features a wear layer that is comparable to the wear layer of our Solid Flooring. Available in Beech, Cherry, Hickory, Maple, Red Oak, Walnut, White Oak, White Oak Live Sawn, and White Oak Quartered & Rift. The substrate is a cross-grained, 11-ply, Baltic Birch plywood, which is adhered to the wood veneer with a hot melt, urethane adhesive.

Due to the thickness of our 5.25mm wear layer, we are able to offer our quality engineered flooring in smooth or in all six of our textured styles.

THE PROCESS QUALITY CONTROL TESTING

The process to create a quality engineered product is to re-saw our existing individual kiln-dried blanks into three veneers. These veneers are then attached to the plywood and placed through a state-of-the-art machine which provides seven areas of compression to allow proper adhesion with the hot urethane adhesive. Critical attention is given to ensure proper production and quality control testing takes place at multiple times throughout this process.

Hickory Character
Herringbone (Site finished)

PREFINISHED FLOORING

In A Wide Variety Of Species & Colors

Prefinished hardwood flooring is available in 3/4" thickness, in both solid or engineered, in both clear and character grades. Please refer to sheogaflooring.com for species, grades, and colors. Stock colors are available in 2 1/4", 3 1/4", 4 1/4", 5 1/4", and 6 1/4" in solid only. Prefinished Engineered or additional widths are available but non-stocked.

CHERRY

American Cherry creates an exceptionally beautiful floor. It is best suited in a low traffic area due to its density.

HICKORY

Prefinished Hickory, one of our most popular flooring options, is available in a Natural finish or in a variety of stained colors.

MAPLE

The best wearing of the hardwoods with a rich, warm look. Hard Maple floors are dense and heavy with good strength properties.

RED OAK

Red Oak prefinished hardwood flooring is dense and strong, and has been the most favored of all wood species.

WALNUT

Its natural brown color adds tasteful beauty to almost any setting. Walnut floors are very strong with excellent dimensional stability.

WHITE OAK

White Oak hardwood floors are very durable. This wood is available with a natural finish in either clear or character grade.

Character Prefinished Hickory Nut

TEXTURED FLOORING

Get A Truly Unique Look

Sheoga offers truly unique options of textures: Old Mill, Vintage Charm, and Country Worn Scrape, as well as Age-Brushed, Band Sawn, and Sawcut for all our unfinished and prefinished solid or engineered flooring. Available in a variety of species and finishes – the choice to create an uncompromisingly rich and distinct look is yours.

AGED BRUSHED

Age-brushed flooring is brushed with a hard-wire wheel. The end result is a dramatic-looking floor, with accentuated character and natural texture.

BAND SAWN

A similar process to our Sawcut texture, Sheoga's band sawn look offers a horizontally-scarred saw cut texture creating a perfectly unique and weathered aesthetic.

SAW CUT

Circular-sawn or Sawcut flooring has been around since the early pioneers. This texture provides an authentic look of times gone by.

COUNTRY WORN

Country worn texture is unique to Sheoga. We have designed a machine which produces a non-repetitive pattern for a unique, time-worn look.

VINTAGE CHARM

Our Vintage Charm scrape is unique to Sheoga. Our randomized knife pattern will create a heavier scrape to closely resemble our Old Mill texture.

OLD MILL

At Sheoga, our craftsmen work exclusively on your flooring, scraping each board by hand. The result is a unique floor – with no two boards exactly alike.

HERRINGBONE

CHEVRON

HERRINGBONE & CHEVRON

Herringbone and chevron patterns have stood the test of time, adding a touch of sophistication to any room. These classic designs create a visually striking effect by arranging the planks in a zigzag or V-shaped pattern. Herringbone offers a more traditional and formal look, while chevron presents a contemporary and dynamic appearance. Sheoga Hardwood Flooring offers all of our wood species, grades, finishes, sizes in both solid or engineered, to create a herringbone or chevron masterpiece that suits your style.

CUSTOM WOOD VENTS & ACCESSORIES

Wood vents are available in unfinished or prefinished styles, in smooth or textured styles to match all our flooring offerings. Standard sizes are widths of 2 ¼", 4", 6", 8" and 10" with standard lengths from 8" to 32" in 2" increments. Custom sizes are available upon request.

Sheoga offers a range of accessories including stair nosing, T-molding, reducer strips, shoe molding, and slip tongue.

ENVIRONMENTAL IMPACT

Commitment To Responsible Manufacturing

Sheoga is located in Ohio's Appalachian forest where nearly all of the timber used in the production of our hardwood flooring is harvested. According to the US Department of Agriculture, there are 1.43 trees growing for every tree that is harvested or dies of natural causes in this region. Some forests in the region have been impacted by insects or disease. Sustainable partial harvesting allows these forests to generate healthy trees. The records show that the Appalachian forest region's timber inventories and acreage have both expanded significantly during the past 50 years. This represents a resource that meets present needs without compromising those of future generations.

Many of our suppliers of hardwood timber are from a large rural Amish community, with some still engaged in using horses to transfer logs to the sawmill. This minimizes damage to young trees and soil and avoids the use of greenhouse-gas-emitting fossil fuels. We also use a wood waste boiler to power our 117,000 sq. ft. manufacturing and showroom space, as well as our 450,000 BF-capacity dry kilns. This also creates excess sawdust which is sold for animal bedding.

MISSION STATEMENT

The Sheoga team is committed to providing the best quality flooring available, combined with integrity and service to meet our ever-expanding customer demands.

We strive to always welcome new customers along with the challenge to meet their high level of expectations, which has proven to bring repeat business and build long-term friendships. Sheoga's primary goal is to be a good steward in serving our Creator, customers, employees, vendors, friends and the community in which we live.
